

iku® windows – the intelligent shutter vertical system

Functions

- Electric shutter system, which allows to move big panels also under high wind load.

At the touch of a button

- Keypad
- Remote Control
- Central control over Building Management Systems (LON, EIB ..)

Individual

- Individual size configurations.
- Various material options like metal, glass, textiles and others are offered, in addition, colour and design choices enable many personal configuration possibilities
- The shutter panels and the guide rail profiles can be individually designed as required.

Low maintenance

- The technology is simple and easily serviced. This applies to both the runner mechanism and to the intrinsic shutter panels

Test values

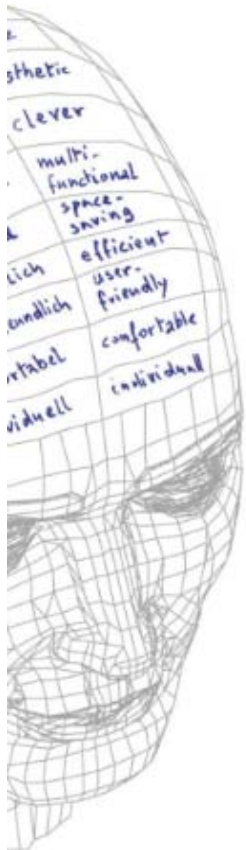

Durability tested

Wind load tested up to 600 PA/N
